

**Fall Dormancy:4**

Positioning For:

**SUITABILITY RATINGS**

**KEY ENVIRONMENTS**

High Yield Environment	Highly Suitable
Lodging Prone Environments	Highly Suitable
Heavy PLH pressure	Manage Appropriately

**SUITABILITY**

Fast Recovery	Suitable
High Forage Quality	Highly Suitable
Frequent cuttings	Suitable

**MANAGEMENT COMMENTS**

- A high-yielding winterhardy variety that has excellent disease resistance and standability to enhance the production of high quality hay or haylage.
- Good early spring growth for heavy first cut yields and excellent standability reducing harvest loss.
- Maintains greater harvestable yield in delayed harvest situations.
- Plant crown and stem architecture provides improved standability and harvest-ability of quality forage when other varieties lodge.
- Excellent disease package helps establish stands and reduce risk during the life of the stand.

**CHARACTERISTIC SCORES**

Relative Forage Quality	8
Forage Yield	7
Fall Dormancy	4
Winterhardiness	8
Herbicide Resistance	

**DISEASE SCORES**

Bacterial Wilt	9
Vert. Wilt	9
Anthracnose	9
Phytophthora Root Rot	9
Aphanomyces (Race 1)	9
Spotted Aphid	7
Pea Aphid	7
No. Root-knot Nematode	7

Disease/Pest Resistance Key: 9 = HR; 7-8 = R; 5-6 = MR; 3-4 = LR; 1-2 = S; Blank = Insufficient Data

Pioneer® brand products are provided subject to the terms and conditions of purchase which are part of the labeling and purchase documents. TM © SM Trademarks and service marks of Corteva Agriscience and its affiliated companies. © 2021 Corteva. 11CM Updated as of 03/2021

**IMPORTANT:** Trait rating scores provide key information useful in selection and management of Pioneer® brand products in your area. Information and ratings are based on comparisons with other Pioneer brand products, not competitive products. Information and scores are assigned by Pioneer Research Managers. Scores are based on period-of-years testing through 2020 harvest and were the latest available at time of printing. Some scores may change after 2021 harvest. Scores represent an average of performance data across areas of adaptation, multiple growing conditions, and a wide range of both climate and soil types, and may not predict future results. All products within a hybrid family receive the same score unless observations indicate a significant difference. Individual product responses are variable and subject to a variety of environmental, disease and pest pressures. Please use this information as only one component of your product positioning decision. Refer to [www.pioneer.com](http://www.pioneer.com) or contact a Pioneer sales professional for the latest and most complete listing of traits and scores for each Pioneer brand product and for product placement and management suggestions specific to your operation and local conditions.

**1 HERBICIDE RESISTANCE:** Do not export alfalfa seeds or crops containing Roundup Ready® technology including hay or hay products, to China pending import approval. In addition, due to the unique cropping practices, do not plan this product in Imperial County, California. Purchase and use of HarvXtra® alfalfa with Roundup Ready® technology is subject to a Seed and Feed Use Agreement. Always read and follow pesticide label directions. Alfalfa with Roundup Ready® technology provides crop safety for over-the-top applications of labeled glyphosate herbicides when applied according to label directions. Glyphosate agricultural herbicides will kill crops that are not tolerant to glyphosate. **ACCIDENTAL APPLICATION OF INCOMPATIBLE HERBICIDES TO THIS VARIETY COULD RESULT IN TOTAL CROP LOSS.** Corteva Agriscience is a member of Excellence Through Stewardship® (ETS). Corteva Agriscience products are commercialized in accordance with ETS Product Launch Stewardship Guidance and in compliance with the Corteva Agriscience policies regarding stewardship of those products. In line with these guidelines, our product launch process for responsible launches of new products includes a longstanding process to evaluate export market information, value chain consultations, and regulatory functionality. Growers and end-users must take all steps within their control to follow appropriate stewardship requirements and confirm their buyers acceptance of the grain or other material being purchased.
